About me

I am a student at SMK Telkom Malang with expertise in Software Engineering. I am proficient in several programming languages and frameworks, and also understand databases. My main focus and expertise is web development in the Frontend field using Next.js.

HardSkill

- Next.js
- HTML,CSS
- SEO
- Node.js

SoftSkill

- Leadership
- Team Work
- Time Management

Sertification

Nov 2025 | Dicoding Academy
Learning the Basics of AI

Experience

Produser Drama Theater   **2023**

Bulan Bahasa - SMK TELKOM MALANG

I became the producer of a drama titled "Sejak Kejadian Itu" (Since That Incident) which was created for the Language Month event in October 2023. This experience trained my leadership skills, especially in organizing teamwork and managing tasks and time well.

Project

Website Landing Page MomoFLorist.com   **2025**

The Momoflorist project is a landing page website project that contains the products and profile of a flower shop in Surabaya. I completed this project in about two weeks using Next.js with a nice UI and smooth UX.

Website Booking PlayStation online   **2025**

The GameStation project is an online PlayStation booking website that contains information on the available PlayStation categories and an online booking system. This website has three views: User, Admin, and Super Admin, with login authorization. I completed this project in about two weeks using Next.js with a great UI and smooth UX.

Website System Order Menu Cafe   **2025**

Project Cafe Order By Table is an online food and beverage ordering website that displays information about available food and beverage categories and their online ordering system. The payment system on this website has two types: offline and online. For offline orders, a unique code will be provided to the cashier, and payment will be made in cash. For online payments, customers can use QRIS or bank transfers. The website has two interfaces: one for users and another for administrators, both requiring authorization for login. I completed this project in approximately two weeks using Next.js, with a sleek UI and smooth UX.

Education

REKAYASA PERANGKAT LUNAK (RPL)   **2023 - Sekarang**

SMK TELKOM MALANG

Studying software development, specifically web development, focusing on web development using Node.js for the backend and Next.js for the frontend.
